SUBJECT: Food Policy Action Plan Update

Summary:

The City of Asheville continues to make progress on the action items identified in the City of Asheville Food Action Plan that was adopted in 2013.

Background:

On January 22, 2013, Asheville City Council passed a resolution establishing the City of Asheville’s Food Action Plan in support of the Asheville Buncombe Food Policy agenda. The Food Policy Action Plan included 14 specific areas to review or take action on to support the shared goals of the City of Asheville and the Asheville Buncombe Food Policy Council.

Since its adoption, City staff has made – and continues to make – significant progress on the action items identified in the plan as shown below.

Update:

Council Approved Action Item	Timeline	Update
Optimize permitting and regulatory services for farmers markets.	Complete	In spring 2013 the fees for farmers markets were lowered and the fee approval process was shortened to three days.
Encourage partnerships for food production that supports organic and permaculture principles by identifying arable underutilized city-owned land for lease or sale. Pursue methods to make information about such land available to the public.	Complete/ Ongoing	Because City-owned land is programmed for existing and/or future municipal uses, and because agriculture requires specific conditions (such as a water source and amended soil), there are limited sites that are attractive for food production in the City’s portfolio. The City’s current lease portfolio supports the following leases of City-owned property to benefit food production and promote food access: <ul style="list-style-type: none">• Ongoing MOU for City real property at DSD/Public Works parking lot for City Market farmer's market• Second year agreement in place for indoor City space at DSD/Public Works for City Market Indoor Winter market• Ongoing lease of City real property at Hardesty Lane for 10 Acres organic Vegetable production (New Sprout, Inc.) has expired. Council is deliberating a new lease with Balsam Gardens.

		<ul style="list-style-type: none"> Ongoing lease of City real property at Hardesty Lane for Danny's Dumpster Industrial Compost <p>City staff met with Buncombe County Cooperative Extension in 2014 to explore partnership opportunities. The Cooperative Extension's interest is in education, small farm business services, and potentially hosting a demonstration garden on City property near the Nature Center. They do not have the capacity / mission to act as a land manager (i.e. managing city community gardens, or city farm leases.)</p>
<p>Prioritize partnering to find a long term permanent location for the Asheville City Market.</p>	<p>Complete</p>	<p>The City extended the terms of the partnership with ASAP to allow use of the conference rooms in Public Works to serve as an Indoor City Market.</p> <p>The City has renewed the MOU with ASAP for continued use of the outdoor parking lot for the regular City Market for the spring, summer and fall seasons.</p>
<p>Seek partnerships to incorporate regional food and beverage options into the U.S. Cellular Center concessions, as well as city-run events.</p>	<p>Ongoing assessment /evaluation</p>	<p>Current USCC local offerings:</p> <ul style="list-style-type: none"> 5 local breweries which represents 78% of sales 1 local cider company Serving The Hop Ice Cream for 100% of ice cream sales The Hop Ice Creams provides the product for 100% of organic lemonade sales <p>USCC was already contracted with a food service provider when the action plan was adopted. That contract expires June 30th. USCC staff intends to put out an RFP in February for food service designed to provide an opportunity for local options. This may result in a cost increase, so Council may see this issue in the spring with the option for more local products at an increase in underwriting.</p>
<p>Include use of edible landscaping as a priority for public property such as parks, greenways and/or right of ways. In support of this, foster relationships with strong community partners who wish to access edible landscaping and/or use underutilized public land for food production.</p>	<p>Ongoing assessment</p>	<p>The City does not have an active landscaping program in City parks. Due to resource constraints, minimal maintenance occurs and minimum requirements are met with low-maintenance native plants. New plantings are mainly achieved through partnerships with community groups. Some of these partners include edibles in their landscape plans.</p> <p>While species selection for new or replacement plantings is determined in large part by soil type and conditions, edible plant options such as service berry trees and blueberry bushes have been both considered and planted more often since the Food Action Plan was adopted.</p>

<p>Utilize the Unified Development Ordinance (UDO) and Animal Ordinance as a tool to support food policy goals by amending the UDO as needed to remove barriers to local food production and distribution. For example, but not limited to, priorities such as community gardens, urban agriculture, and use of mobile markets in residentially zoned districts under certain circumstances such as farmers markets.</p>	<p>Complete</p>	<p>Ordinance No. 4233 (also known as the Agricultural Amendment), adopted on September 24, 2013, amended chapter 7 of the UDO to clarify and modify regulations addressing agriculture and increase flexibility for agricultural uses. Changes included:</p> <ul style="list-style-type: none"> • Allowing agricultural structures (i.e. small barns/storage buildings, greenhouses) on residentially zoned properties with no home structure • Allowances for farm stands in residentially zoned areas <p>Existing City code allows livestock (§3-3-36) and fowl (§3-3-50) on urban lots with a permit and not less than 100 feet away from neighboring households (50 feet for fowl). Livestock are also permitted to be used for temporary ground clearing with a permit.</p>
<p>Update the city recommended plant list for developers to include edible plants and remove exotic and invasive species.</p>	<p>In process</p>	<p>SACEE and the Tree Commission updated this list of recommendations provided to developers if they inquire to meet UDO landscaping design requirements. Staff is currently working with the Tree Commission on another update to make the list more user-friendly.</p>
<p>Include achieving food policy goals as a priority when allocating Community Development Block Grants.</p>	<p>Annual application process</p>	<p>Proposals are welcome and will be considered.</p>
<p>Support Asheville Buncombe Food Policy Council efforts to set baselines and metrics for achieving food policy goals. Play an active role in providing access to existing city data when needed.</p>	<p>In process</p>	<p>City staff is working with the Asheville Buncombe Food Policy Council to include existing City data on Buncombe County's Community Health Improvement Process (CHIP) online indicators dashboard in the area of Healthy Food Goals.</p>
<p>Encourage food distribution by engaging underserved communities who live in food deserts. Support community efforts by co-designing incentives that establish neighborhood based markets that provide healthy food.</p>	<p>Ongoing</p>	<p>City staff have been doing outreach to the many urban food and gardening efforts in the area to review opportunities for partnerships. Staff is currently in discussion with the West End Clingman Area Neighborhood Association about the development of a pilot community garden on the City-owned transit facility property on West Haywood.</p>
<p>Incorporate food policy goals into education programs for city staff and the general public.</p>	<p>Each Summer</p>	<p>Educational summer programming at city community centers. 120 youth participated summer 2013.</p>

<p>Create a public private partnership for implementing a citywide curbside composting program that complements trash and recycling services. A successful partnership would improve regional economic development and provide compost regionally to support healthy ecological soil systems.</p>	<p>Study results expected Spring 2015</p>	<p>A compost feasibility study with Buncombe County is currently being conducted, with results expected in the spring of 2015. Next steps and timeline will depend on the results of the feasibility study.</p>
<p>Pursue establishing local food purchasing policies for the City of Asheville through clarity on existing state legislation as well as state enabling legislation where needed.</p>		<p>No progress at this time. Not currently identified on the Council legislative agenda.</p>
<p>Include safe and convenient pedestrian, bicycle, and transit connections between residential neighborhoods and community gardens, food banks, grocery stores and farmers markets as a priority when evaluating transportation projects.</p>	<p>Ongoing</p>

- 1) Resolution No. 13-17

RESOLUTION NO. 13-17

RESOLUTION ESTABLISHING THE CITY OF ASHEVILLE'S FOOD ACTION PLAN IN SUPPORT OF THE ASHEVILLE BUNCOMBE FOOD POLICY AGENDA

WHEREAS, the City of Asheville believes that all citizens should have access to healthy, nutritious food and that our community should be able to sustain its nutritional needs year-round with regionally grown, processed and stored healthy food; and

WHEREAS, The Asheville Buncombe Food Policy Council defines healthy food as grown locally through organic and permaculture principles, from seeds, plants, and animals that are not genetically modified and in a manner that builds the fertility of the soil; and

WHEREAS, all communities should be empowered with access to resources and information needed to innovate and implement strategies for food security and resiliency; and

WHEREAS, our regional food economy can thrive and promote social and ecological sustainability, providing for human needs while protecting the diversity and abundance of our bioregion, including our forest land, agricultural land and watershed; and

WHEREAS, the City of Asheville recognizes that intact, biodiverse and healthy forest ecosystems provide abundant food and clean water in perpetuity; and

WHEREAS, all citizens should enjoy food sovereignty through access to clean water, air and land, as well as the ability to cultivate, harvest, process, sell, share and trade food in order to thrive and empower their own resilience;

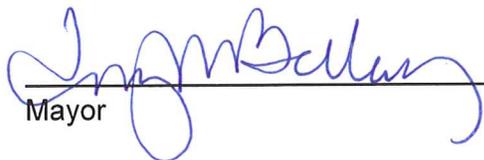

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ASHEVILLE THAT:

The City of Asheville approves the attached Food Policy Goals and Action Plan by incorporating it into the adopted Sustainability Management Plan and any amendments thereto.

Read, approved and adopted this 22nd day of January, 2013

City Clerk

Mayor

Approved as to form:

City Attorney

Municipal Food Policy Goals and Action Plan

City of Asheville Long Term Food Policy Goals

The City of Asheville commits to participating in the Asheville Buncombe Food Policy Council efforts and supports the following shared goals:

1. Improve the quality of life for those in need by increasing access to food for people who experience food insecurity.
2. Continue growing a robust regional food economy by increasing production and consumption of regional food and food products.
3. Strive to meet all nutritional needs of the community with regionally produced foods.
4. Work to prepare for short-term food emergencies and long-term food security.
5. Collaborate with regional partners to achieve all food policy goals.

City of Asheville Food Policy Action Plan

1. Utilize the Unified Development Ordinance (UDO) as a tool to support food policy goals by amending the UDO as needed to remove barriers to local food production and distribution. For example, but not limited to, priorities such as community gardens, urban agriculture, and use of mobile markets in residentially zoned districts under certain circumstances such as farmers markets.
2. Optimize permitting and regulatory services for farmers markets.
3. Prioritize partnering to find a long term permanent location for the Asheville City Market.
4. Pursue establishing local food purchasing policies for the City of Asheville through clarity on existing state legislation as well as state enabling legislation where needed.
5. Seek partnerships to incorporate regional food and beverage options into the U.S. Cellular Center concessions, as well as city-run events.
6. Create a public private partnership for implementing a citywide curbside composting program that complements trash and recycling services. A successful partnership would improve regional economic development and provide compost regionally to support healthy ecological soil systems.
7. Include use of edible landscaping as a priority for public property such as parks, greenways and/or right of ways. In support of this, foster relationships with strong community partners who wish to access edible landscaping and/or use underutilized public land for food production.

8. Encourage partnerships for food production that supports organic and permaculture principles by identifying arable underutilized city-owned land for lease or sale. Pursue methods to make information about such land available to the public.
9. Update the city recommended plant list for developers to include edible plants and remove exotic and invasive species.
10. Include safe and convenient pedestrian, bicycle, and transit connections between residential neighborhoods and community gardens, emergency food providers/food pantries, grocery stores and farmers markets as a priority when evaluating transportation projects.
11. Include achieving food policy goals as a priority when allocating Community Development Block Grants.
12. Support Asheville Buncombe Food Policy Council efforts to set baselines and metrics for achieving food policy goals. Play an active role in providing access to existing city data when needed.
13. Encourage food distribution by engaging underserved communities who live in food deserts. Support community efforts by co-designing incentives that establish neighborhood based markets that provide healthy food.
14. Incorporate food policy goals into education programs for city staff and the general public.
