RE: City of Asheville Inventory Review Packet

Dear Debbie,

The following document contains the Inventory Review Packet for the City of Asheville. A draft version of the System Map is available for review as well and was sent as a separate file. The documents and map represent data compiled during the initial data collection and field visits conducted in January. During your review, please examine the following for accuracy:

- Park boundary

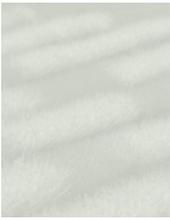

- Component type

Components with Score						
MAPID	Component	Quantity	Lights	Neighborhood Score	Community Score	Comments
274	Trail-Multi-Use	1		2	2	
273	Water Access-Develop	1		2	2	fishing deck-ada access
272	Water Access-General	1		2	2	
271	Open Water	1		3	3	

- Component location

- Evaluation (score) of component condition

Components with Score						
MAPID	Component	Quantity	Lights	Neighborhood Score	Community Score	Comments
274	Trail-Multi-Use	1		2	2	
273	Water Access-Develop	1		2	2	fishing deck-ada access
272	Water Access-General	1		2	2	
271	Open Water	1		3	3	

- Evaluation of comfort and convenience features

Modifiers with Scores				
Drinking Fountains		Shade	2	Design and Ambiance 2
Seating	2	Trail Connection		
BBQ Grills		Park Access	2	
Dog Pick-Up Station		Parking	2	
Security Lighting		Seasonal Plantings		
Bike Parking		Ornamental Planting		
Restrooms		Picnic Tables	2	

- Evaluation of park design and ambience

Modifiers with Scores				
Drinking Fountains		Shade	2	Design and Ambiance 2
Seating	2	Trail Connection		
BBQ Grills		Park Access	2	
Dog Pick-Up Station		Parking	2	
Security Lighting		Seasonal Plantings		
Bike Parking		Ornamental Planting		
Restrooms		Picnic Tables	2	

- General Comments

General Comments
new additions are occurring, future connection to Clingman Forest Trail

Any edits to the dataset will be addressed and corrected during a scheduled conference call with Design Concepts, Greenplay and Geowest. We will contact you in the next few days to schedule this call during a time that is convenient time for you and other city staff members involved in this project.

Sincerely,

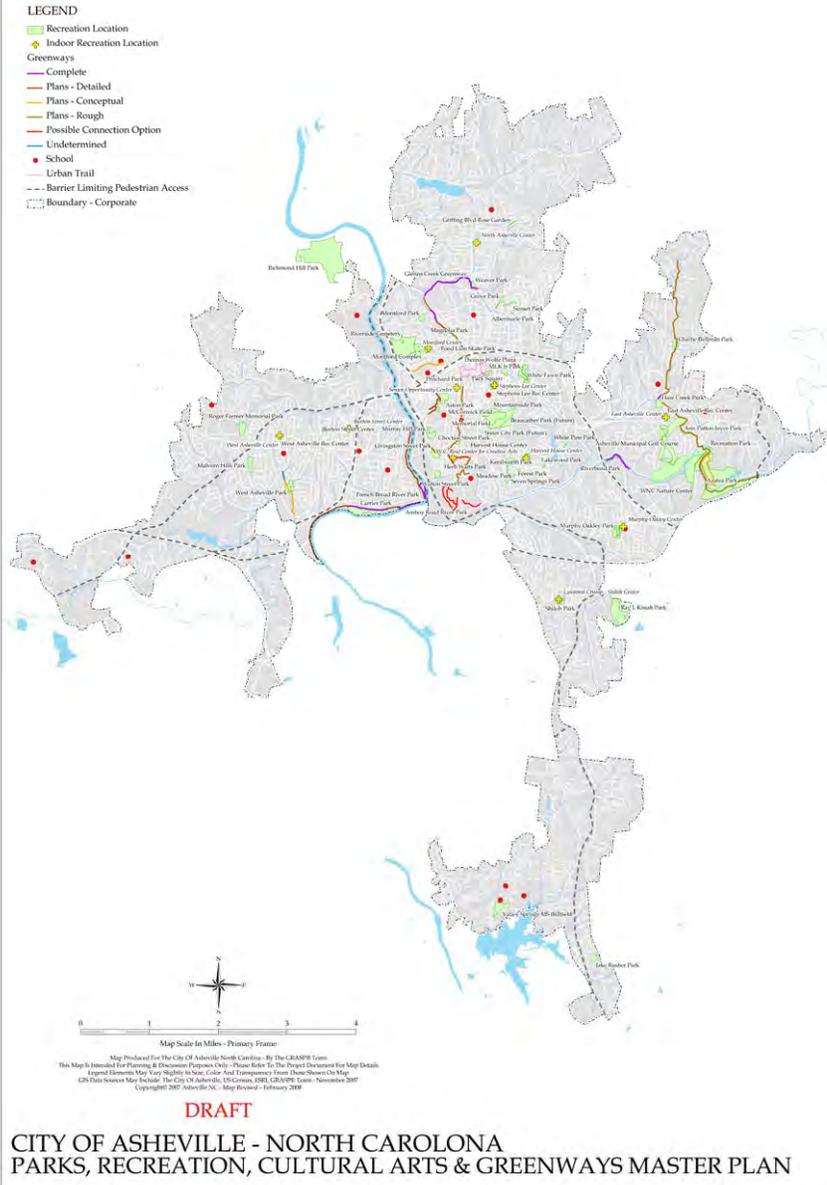

Amanda Bower
Landscape Designer

Asheville, North Carolina

Inventory Review Packet

February 2008

RESOURCE MAP B: SYSTEM

Inventory Process and Scoring Information

The inventory was completed in a series of steps. The planning team first prepared a preliminary list of existing components using aerial photography and the city's Geographic Information System (GIS). Components identified in the aerial photo were given GIS points and names.

Next, field visits were conducted by the consulting team and by city staff to confirm the preliminary data and collect additional information.

During the field visits and evaluations, missing components were added to the data set, and each component was evaluated as to how well it met expectations for its intended function. During the site visits the following information was collected:

- Component type
- Component location
- Evaluation of component condition - record of comfort and convenience features
- Evaluation of comfort and convenience features
- Evaluation of park design and ambience
- Site photos
- General comments

The inventory team used the following three-tier rating system to evaluate each component:

B = Below Expectations (1)

M = Meets Expectations (2)

E = Exceeds Expectations (3)

The scores were based on such things as the condition of the component, its size, or capacity relative to the need at that location, and its overall quality.

Components were evaluated from two perspectives: first, the value of the component in serving the immediate neighborhood, and second, its value to the entire community.

The setting for a component and the conditions around it affect how well it functions, so in addition to scoring the components, each park site or indoor facility was given a set of scores to rate its comfort, convenience, and ambient qualities. This includes such things as the availability of restrooms, drinking water, shade, scenery, etc.

Information collected during the site visit was then compiled and corrections and comparisons made to GIS. Following the comparisons and compilation, the inventory was sent to the City staff for corrections and comments.
