Water discoloration in parts of city due to main line evaluation

The City of Asheville Water Resources is reporting intermittent discolored water in parts of the city due to a main-line evaluation currently underway.

The location and duration of the discoloration will vary and all customers including businesses may experience discolored water.

Water Services staff is monitoring the locations of discolored water and are flushing to clear the water as fast as possible. Personnel are also maintaining regular water testing protocol during the evaluation.

Updates on the situation will be sent by press release and the customer notification system as more details are available. Water customers are advised wait until their water runs clear before consuming it.

To sign up for the customer notification system, call 211 or visit www.ashevilenc.gov.
