

Differences in the East of the City

These maps shows the East of Asheville in the **Existing Network** and the **Draft Network**. Remember that the Draft Network has been designed to focus a little more on services that can maximize ridership while keeping coverage in areas with many low-income persons.

Removal of Coverage

In the East, the Draft Network removes service from these places:

- Social Security Office
- Kenilworth Road

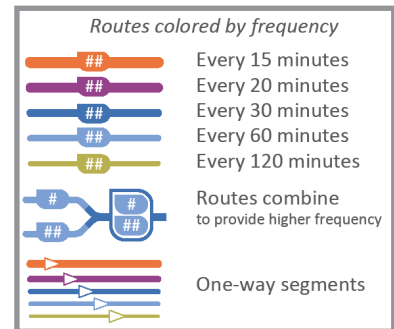

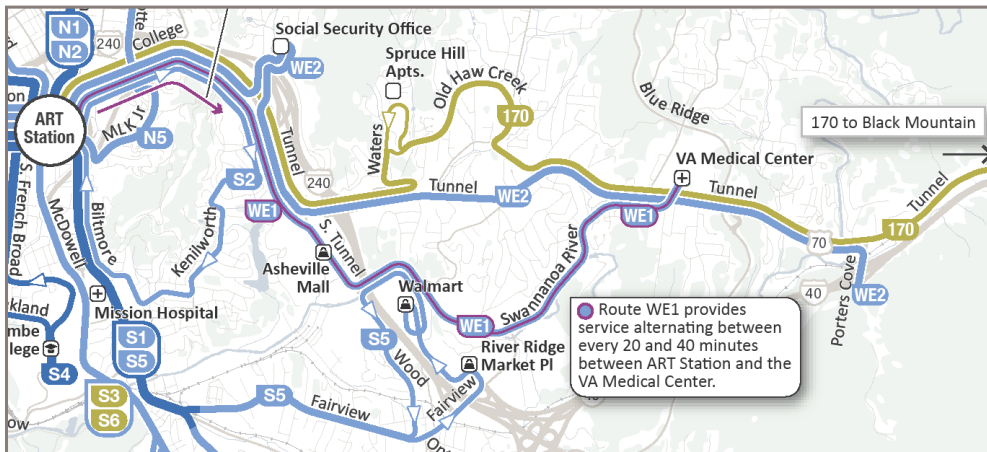

Higher Frequency

In the East, the Draft Network has 60-minutes service in Haw Creek (and Spruce Hill Apartments)

Other changes

Today, the service on tunnel road alternates between 20 and 40 minutes. This inconsistency is troublesome for transit riders because they can only consistently depend on 40-minute frequency. In the Draft Network, Route 5 on Tunnel Road runs every 30 minutes.
