

Differences in the South of the City

These maps show the South of Asheville in the **Existing Network** and the **Draft Network**. Remember that the Draft Network has been designed to focus a little more on services that can maximize ridership while keeping coverage in areas with many low-income persons.

Removal of Coverage

In the South, the Draft Network removes service from MAHEC.

Higher Frequency

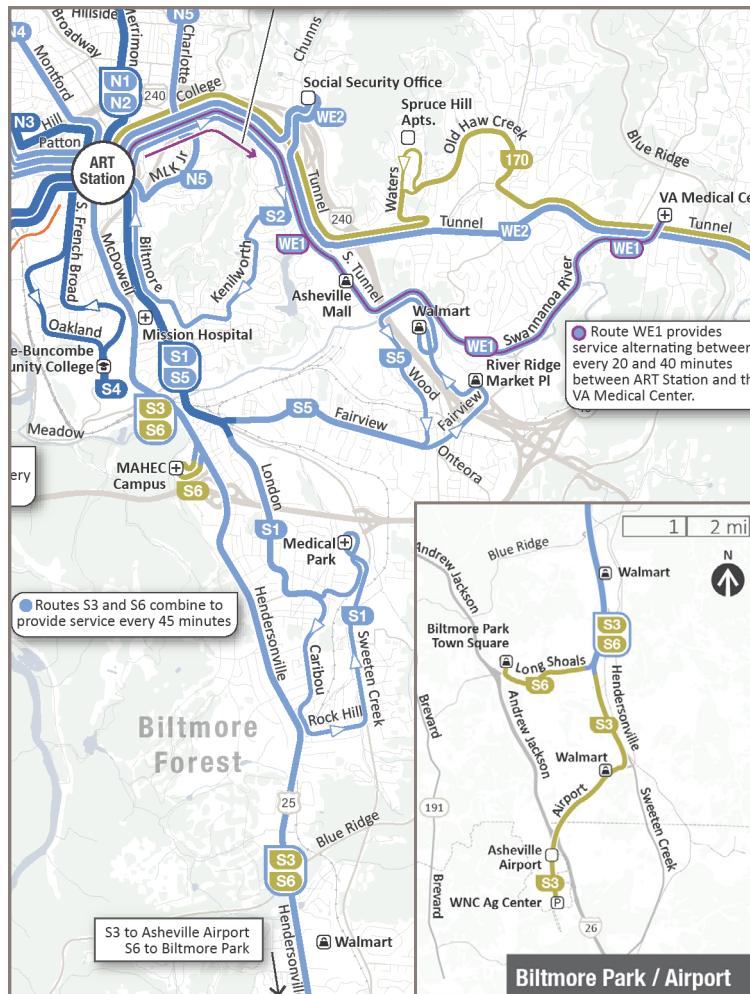

In the South, the Draft Network has:

- 15-minute service south of Downtown along Biltmore Avenue and McDowell to Biltmore Village.
- 30-minute service south of Biltmore Village along Hendersonville Road
- 60-minute service to the Airport and Biltmore Park

Other changes

The service to Shiloh now has a one-way loop that goes south along London Road and north along Sweeten Creek Road. This will make the overall route faster to improve travel time and on-time performance.
